For the 2008 Roundup, the emphasis is on **Media in Missions**, that is, how media, including printed materials, the internet, video/dvd, radio, television, and satellite programming, are used in the mission field and in various mission efforts both far and near. A sampling of most of these types of media are being highlighted during the 2008 World Missions Roundup.

You are invited to take advantage of this opportunity of examining and learning about these various forms of media and how they reach out on a massive scale to people of this world who are lost in darkness. Your presence and interest will be an encouragement to these brethren who are presenting how the body of Christ can use these media to the glory of God.
